EDUCATION

University of Michigan, College of Literature, Science, and Arts

Ann Arbor, MI

Bachelors of Science in Computer Science, Minor in Applied Statistics

Sep 2020 – December 2023

- **Courses:** Web Systems (EECS 485), Database Management (EECS 484), Software Engineering (EECS 481), Statistics and Artificial Intelligence (STATS 315), Data Structures (EECS 281), Linear Algebra (MATH 214)

WORK EXPERIENCE

PayPal

Chicago, IL

Software Engineer

April 2025 - Present

- **Agentic Commerce:** Developing integrations between PayPal checkout and LLM platforms (Perplexity, Copilot, Meta) to enable agentic checkout within their native shopping interfaces.

Software Engineer

February 2024 - April 2025

- **Developer Studio:** Collaborated on a react application that seamlessly enables PayPal Checkout, streamlining the process of integrating a payment source for thousands of merchants.

AI/ML Engineer Intern

June 2023 - August 2023

- **AI ChatBot:** Deployed a Generative AI chatbot for the Orders API slack channel, providing real-time, context aware assistance to nearly 1,000 merchants on a daily basis.
- **Document Embeddings:** Utilized transformer models to convert technical documentation into searchable embeddings, reducing the retrieval process by 40%.

Software Engineer Intern

May 2022 - August 2022

- **API Latency Reduction:** Reduced latency of the payments API flow by 40-60 ms by creating an asynchronous thread on a feature that gets merchant information.

Womply

San Francisco, CA

Software Development Intern

June 2021 - August 2021

- **Sentiment Analysis:** Created an algorithm using NLP Python packages (e.g. spaCy and NLTK) to identify negative sentiment from customer reviews.
- **Search Engine Interface:** Developed a search engine interface using Apache Solr to visualize the negative customer review data and allow over 250,000 companies to gain valuable business insight.

UIC Research - Informatics Core

Chicago, IL

Data Science Intern

June 2020 - August 2020

- **Training Models:** Constructed a random forest regression in Python to identify cancer invasion level using polymeric genes as the training dataset, leading to be 80% accurate.
- **Data Representation:** Generated graphs outlining the relationship between qPCR values and cancer level using R.

PERSONAL PROJECTS

Abode

Chicago, IL

AI Apartment Finder

2025

- **Agentic Automation:** Built an MCP server with agentic tools for scraping listings, evaluating nearby amenities, and drafting inquiries to landlords, aiming to automate apartment hunting
- **Search Interface:** Created a searchable UI for browsing and filtering the auto-generated listings in real time.

Atlas Digital Consulting

Ann Arbor, MI

Project Manager, React Web App Development

February 2021 - December 2023

- **Cantoo LLC:** Revamped a react platform that offers management and leadership coaching for organizations.
- **U of M Basketball App:** Created an app for the U of M basketball team to track player training.

SKILLS

Languages: Python, C++, JavaScript, TypeScript, R, Java

Technologies/Frameworks: React, SQL, LangChain, TensorFlow, PyTorch
